Codeintel Code Obfuscation Analyzer: how it is put together

sketched from the files

Codeintel Code Obfuscation Analyzer: the run, step by

If a step fails, the honest run says so and stops.

traced, not guessed, GK

Product map: what Codeintel Code Obfuscation Analyzer is for

WHAT IT IS

A small project in Python, Text, Markdown. The README and the files are the whole claim.

WHAT GOES IN

The files at the top of the tree: main.py, requirements.txt, README.md.

WHAT COMES OUT

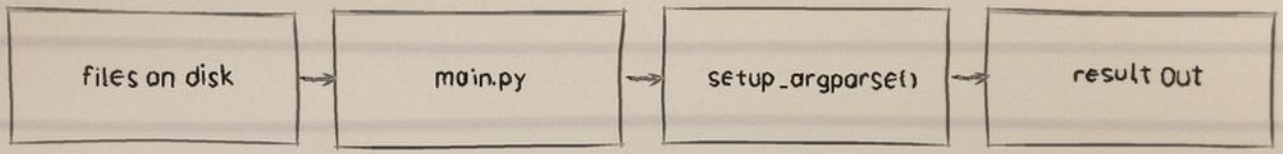

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, OK

Codeintel Code Obfuscation Analyzer: data flow, in one direction

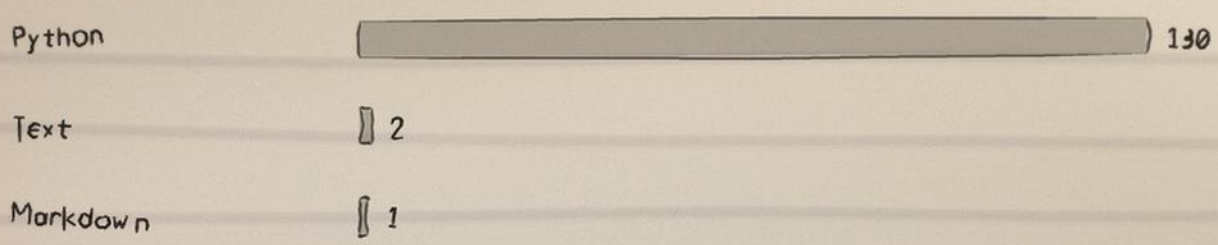

One direction. Anything the code does not do is not drawn.

Second sheet, GK

Codeintel Code Obfuscation Analyzer in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

4 files in the tree.
5 commits, first 2025-01-02, last 2025-01-02, from the local git log.
No test files by name in this snapshot.

counted and drawn, GH

Codeintel Code Obfuscation Analyzer: schematic of the apparatus

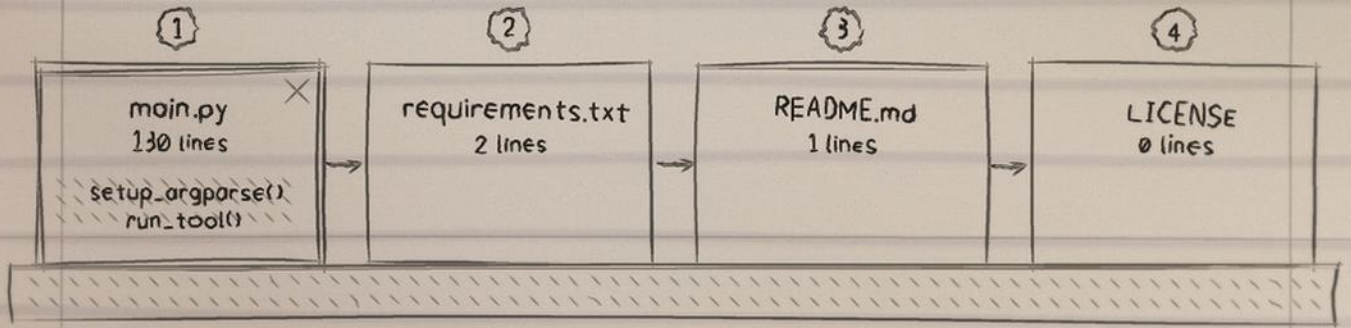

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. main.py
2. requirements.txt
3. README.md
4. LICENSE

in flow order, first to last

base plate: the repo itself, sectioned

span: 4 files, 133 lines counted

turns of the crank so far: 5 commits, 2025-01-02 to 2025-01-02

measured and sketched,
